

MYTAVERSE

Mytaverse builds realistic, 3D experiences hosting multiple users for the creation of hybrid work environments

---

- Using the Unreal Engine to craft high-quality graphics, we create realistic virtual experiences with people, products, and environments
- Interaction with these environments is realized in a cloud-based world, without requiring users to wear virtual reality or augmented reality gear
- Access from Anywhere: Our cloud streaming solutions allow you to access Mytaverse from anywhere in the world
- Built to scale based on large exhibition halls from across the world, our platform’s virtual environments will have attendees and exhibitors fully immersed
- Business in the Metaverse is our specialty

Mytaverse is a cloud-based platform for fully immersive 3D multiplayer experiences that recreate true-to-life interactions and environments. By reimagining how people work, our answer to the business metaverse enables colleagues and clients to meet face-to-face in an interconnected digital world at any time, from anywhere in the world and through any device.

At a time when travel has become less practical the Mytaverse platform can make business travel obsolete and meeting easy and cost-effective.

Mytaverse was founded in Miami, Florida in early 2020. Ever growing, our team today is composed of over thirty professionals from a wide array of backgrounds: tech development, former C-level executives, logistics, sales and marketing professionals. Tested by time, this dynamic team is using all its know-how to create a more seamless and true-to-life virtual experience in a dimension we call the Mytaverse Experience.

- How the Metaverse Can Improve Work Meetings?
- Unlimited space for ideas
- The Ability to Visualize and Solve Problems in 3D
- Engagement That Feels Like a Video Game
- Removing Remoteness From Remote Work
- An Increased Ability for Self-Expression

We call it the Mytaverse Experience. Best of all, no special equipment required!

TEMAS

- Mytaverse
- Meetings & Events

PROGRAMAS

SPECIAL CHARACTERISTICS

- 3D Spatial Sound: Our 3D sound technology allows you to have true-to-life talks with other users inside of the virtual world
- Access from Anywhere: Our cloud streaming solutions allow you to access Mytaverse from anywhere in the world
- Hardware Agnostic: Mytaverse is accessible through several web browsers (including Google Chrome and Microsoft Edge) in different platforms without the need for downloads or any special hardware requirements
- We're developing cutting edge technology to provide you with awesome features:

1. Multi-Platform Access
2. Real Time Global and Private Chat
3. Voice Chat and Boradcast
4. Webcam Sharing
5. Screen Sharing
6. Media Broadcast
7. Private Meetings
8. Realistic Scale Models
9. Facial Recognition (coming soon)
10. Customizable World

SOLUTIONS

Limited only by one’s imagination, Mytaverse offers several core solutions: Simulations, Showrooms and Conferences, Workspaces and much more.

- Tradeshows and Conferences:

Built to scale based on large exhibition halls from across the world or like conventional product showrooms, our platform’s virtual environments will have attendees and exhibitors fully immersed. Your guests will feel like they've been here before thanks to the true-to-life detail that we carve into every space we design.

Standard pre-built spaces are available, as are more bespoke options.

- Simulations:

Onboarding new personnel or upskilling current employees is a first-level priority for companies seeking to maintain competitive relevance. The process can be both time-consuming and quite costly for companies, regardless of industry.

Using realistic and highly detailed environments that meet and exceed original requirements, Mytaverse not only assists companies in providing better and more efficient training but can also help in lowering overall costs for such initiatives.

- Showrooms:

Use our platform's pre-built spaces or customize your own three-dimensional environments based on your business needs, your company's branding elements and your creative ideas. From paper cups to airplanes, we can make your products transcend into the virtual realm in realistic and intricate detail.

Workspaces can range from simple meeting pods for smaller gatherings all the way to interactive boardrooms for larger groups and everything in between.
