JEAN-BAPTISTE DJEBBARI

Former French Minister of Transport, is a leader in sustainable mobility, energy, and infrastructure, with a focus on innovation

---

- Former French Minister of Transport, championing modernization and decarbonization of France's transport and energy sectors
- Executive Chairman at Hopium, a hydrogen fuel-cell innovator, reshaping the strategy and growth of the clean energy company
- Managing Partner at Magellan Infrastructure Partners, focusing on green energy, decarbonized mobility, and resource preservation
- Former airline pilot with executive roles in aviation, still flying today with expertise in sustainable aviation fuels
- Advisor to aerospace companies and investor in multiple mobility start-ups, with a focus on industrialization and international growth

Jean-Baptiste Djebbari is a prominent leader in sustainable transportation, aviation, and energy, known for his innovative approach to modernizing infrastructure and advancing clean energy solutions. Beginning his career as an airline pilot, Djebbari transitioned into executive roles within the aviation sector, bringing a practical perspective to his leadership. In 2017, he was elected to the French Parliament, and in 2019, he was appointed Minister of Transport for nearly three years. During his tenure, Djebbari led transformative initiatives, including the decarbonization of France's automotive and aviation sectors, rail system modernization, and advancements in satellite technology for transportation.

After his political career, Jean-Baptiste served as Executive Chairman at Hopium, a hydrogen fuel-cell vehicle start-up, where he redefined the company's strategy and secured partnerships to propel its growth. Currently, as Managing Partner of Magellan Infrastructure Partners, he oversees projects that finance sustainable infrastructure focused on green energy and resource preservation. Djebbari also serves on boards in the aerospace industry and advises companies on industrialization and global expansion strategies.

A graduate of Ecole Nationale de l'Aviation Civile and Ecole Polytechnique, Djebbari's extensive training and experience are reflected in his hands-on expertise in both technical and policy-driven aspects of transportation and energy. He is a seasoned keynote speaker on topics like sustainable energy, aviation, infrastructure, and the geopolitical implications of modern transportation.

TEMAS

Jean-Baptiste tailors each presentation to the needs of his audience and is not limited to the topics listed below. Please ask us about any subject that interests you:

- Decarbonizing Transportation and Energy
- Aviation and Aerospace in the 21st Century
- Infrastructure Development for a Green Future

PROGRAMAS

"Decarbonizing Transportation: Innovations in Sustainable Mobility"

Djebbari shares insights from his tenure as Minister of Transport, focusing on practical solutions and breakthroughs in reducing carbon emissions across transport sectors.

"Aviation and Aerospace: The Next Frontier in Clean Energy"

This keynote explores the latest in sustainable aviation technology, including hydrogen fuel cells, and the broader impact on aerospace and global logistics.

"Infrastructure and Energy Policy: Building Resilient, Green Cities"

Djebbari discusses the intersection of policy, infrastructure, and sustainability, offering frameworks for developing cities that prioritize environmental preservation and resource efficiency.
